

Blockchain RE-SYNC with Blockchain Snapshot.

1. BACKUP WALLET.DAT FILE
2. Uninstall old Worldcoin Wallet.
3. Download latest snapshot from worldcoin.global website.
4. Head to your existing Worldcoin directory here:
C:\Users>YOURUSERNAME>AppData>Roaming>Worldcoin (if appdata is not visible go to file explorer. Select view & make sure hidden items is checked.) Now remove everything except your wallet.dat file. DO NOT TOUCH YOUR WALLET.DAT FILE!!!
5. Unzip folder and move 2 new folders blocks & chainstate along with the file worldcoin.config from the .zip you just downloaded here:
C:\Users>YOURUSERNAME>AppData>Roaming>Worldcoin
6. Download New Worldcoin wallet from worldcoin.global
7. Close out file explorer and run wallet. Be very patient, it could take a few hours to index the first time you run the wallet.

Blockchain RE-SYNC from scratch.

1. BACKUP WALLET.DAT FILE
2. Uninstall old Worldcoin wallet.
3. Head to your existing Worldcoin directory here:
C:\Users>YOURUSERNAME>AppData>Roaming>Worldcoin (if appdata is not visible go to file explorer. Select view & make sure hidden items is checked.) Now remove everything except your wallet.dat file. DO NOT TOUCH YOUR WALLET.DAT FILE!!!
4. Download New Worldcoin wallet from worldcoin.global
5. Close out file explorer and run wallet. Be very patient, it will take many hours to download the blockchain the first time you run the wallet.
